

Quality Statement

Milking Solutions spare parts and equipment are manufactured to the highest quality. Wherever possible, Milking Solutions works with companies who for many years have manufactured original spare parts for Gascoigne and then Gascoigne Melotte milking equipment. This strategy has removed the risk of parts failure. As a result, Milking Solutions have developed an excellent reputation for providing very high quality exact fit spare parts for Gascoigne Melotte milking equipment.

Some of the major manufactures of Milking Solutions products have the following Quality, Management, Production and Environmental accreditations:

Manufacturer Accreditations

- UKAS Quality Management ISO 9002
- UKAS Quality Management ISO 9001 :2000
- Plastic Industry awards
- Environmental Management Standards ISO 14001
- Standards and management best practice TS 16949
- Six Sigma -99.99966% (no more than 3.4 defects per million).
- Kaizen - Improvements achieved by people at the workplace

Material Quality

All Milking Solutions products are specifically designed for milking machine use. The materials used in the manufacture of these products comply with the stringent EU-**BGVV** (formerly BGA) and BFR European food grade standards.
